

Tanglewood Residents: Compact Fluorescent Light Bulbs Save Money

Replacing your incandescent light bulbs with longer-lasting compact fluorescents (CFLs) is a smart idea. To help you get started, we're replacing most of your incandescent bulbs with CFLs free of charge. And best of all, one CFL and save \$35 over its lifetime.

We are replacing incandescent lightbulbs in this apartment with CFLs, in order to **SAVE** you money and reduce the impact on the environment. Please let us know what you think about the bulbs and this project by participating in a follow-up survey, which will be mailed to you next month.

This pilot project is part of a movement to develop a sustainable campus and is supported by UF's Office of Sustainability and Gators for Sustainable Campus (project design), GRU (CFL bulbs), International Carbon Bank and Exchange (energy analysis), the Department of Housing and Residence Education (project implementation) and YOU, the great residents of Tanglewood Village.

Thank you for your cooperation in this special project. If you have any questions, you may contact:
